

Class Activity-04

Name: Siddhant Bali

Roll No: 2022496

- 1. Visibility:** Lift panels with illuminated buttons indicating the current floor and also gives direction it's going in.
- 2. Consistency:** Microsoft Office Suite, where menus, toolbars, and shortcuts follow a consistent design, making it easier to switch between applications.
- 3. Familiarity:** Across all the platforms that we use, the "search", phone, mail, icons are very much familiar.
- 4. Affordance:** We have noticed Door handles that are designed to be pushed or pulled intuitively, such as a push plate for pushing and a bar for pulling.
- 5. Navigation:** We have seen kiosks in many shopping malls, and airports, which help in proper navigation and directional guidance.
- 6. Control:** Smart home apps like Google Home or Alexa allow users to control devices like lights, air conditioners, and speakers directly, giving them control over their environment.
- 7. Feedback:** Online forms provide instant feedback, such as highlighting mandatory fields or displaying a green checkmark for valid entries.
- 8. Recovery:** Gmail's "Undo Send" feature allows users to retract emails for a short period after clicking "Send."
- 9. Constraints:** Online banking apps prevent users from entering invalid characters when filling out numerical fields like account numbers or transaction amounts.
- 10. Flexibility:** Photoshop offers shortcuts for experienced users while also providing toolbars and menus for beginners.
- 11. Style:** Apple devices and apps, known for their sleek and minimalist designs, combine functionality with an aesthetically pleasing interface.
- 12. Conviviality:** Many games provides you reward on level completion.
